

JANUARY 6, 2025

PHASE 1 OPEN TO TRAFFIC

The first phase of the Reimagine Pleasant Street project, which includes Pleasant Street from River Road to the new roundabout at 10th Street, is open to traffic! Phase 1 construction also included the new bridge over the White River, a roundabout at River Road and Pleasant Street, and two roundabouts along Eighth Street. This phase also connected the Riverwalk Trail, Nickel Plate Trail, and Midland Trace Trail to enhance access to downtown for pedestrians and cyclists!

ADDITIONAL PLEASANT STREET CLOSURES BEGINS SOON

Beginning on or after Jan. 13, Pleasant Street will be closed from 11th Street to 16th Street. The closure is required to reconstruct and widen Pleasant Street to four lanes and also includes reconstruction of the bridge over Wilson Drain. When complete, these roadway improvements will reduce the potential for roadway flooding and allow Pleasant Street to be maintained as an emergency route. *See attached maps.*
