

Connecting our community

- + Improved mobility
- + enhanced access
- + Improved safety

GROUND BREAKING

Noblesville and Hamilton County officials broke ground on the transformative Reimagine Pleasant Street project on Monday, November 14. Check out some photos from the event!

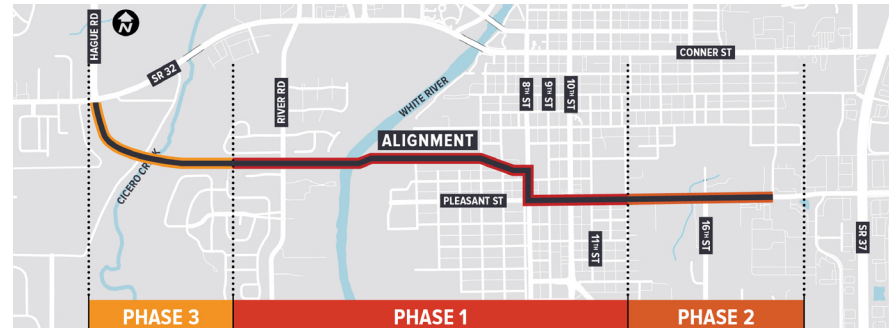

WHAT IS THE PLEASANT STREET PROJECT

The City of Noblesville is building a new east-west roadway and trail corridor that connects SR 32 and SR 37. The project will bring much needed traffic relief to an already congested SR 32 through downtown. Reimagine Pleasant Street is a project that addresses the critical future mobility and growth of Noblesville. More than just a road project, Reimagine Pleasant Street will create a safe, vibrant corridor for residents to drive, walk, or bike to downtown. This long-awaited infrastructure improvement is a strategic transformation of Noblesville—and one that will bring benefits to generations of city residents. [Learn more about the project on our website.](#)

STAY UP TO DATE WITH THE LATEST INFORMATION

Each month, the City of Noblesville will bring you updates, details and interesting aspects of the Reimagine Pleasant Street project in an effort to keep you up to date on our progress. **We also encourage you to follow the project on Twitter and Facebook!**

UTILITY RELOCATION

Duke Energy and CenterPoint Energy crews are actively relocating utility lines for the future Pleasant Street alignment. Some minor traffic restrictions will be happening throughout the area as they complete their work by the end of March. You may also notice additional truck traffic in the southwest quad as materials are delivered to the project area.

BRIDGE CONSTRUCTION

The contractor is drilling the foundation shafts for the new bridge, and this work should be complete in the next 60 days. Drilling on the west side of the river is now complete. Equipment will move to the east side for drilling. Reinforcing steel placement and concrete pours will finish the below-ground foundation pieces.

Construction crews are preparing to remove the historic bridge that once carried the Midland Railway over the White River. Once the bridge has been removed, it will be carefully disassembled so that it can be reconstructed at a future date.

SANITARY SEWER AND STORM WATER WORK

In the next 30 days, work will begin for improving the sanitary sewer system and installing new storm water systems. With drilling on the west side of the river complete, pipe crews will be in the area from the river to River Road installing the sanitary sewer and storm sewer systems. Service should remain uninterrupted during this time.
